

Performance When the Pressure is On

Compressor Filtration Solutions

Donaldson[®]
FILTRATION SOLUTIONS

DON'T SETTLE FOR LESS

Unplanned downtime often means lost productivity and revenue.

To keep your organization's compressor running efficiently, you need filters that deliver superior performance and a dependable supplier capable of providing complete coverage for your entire asset.

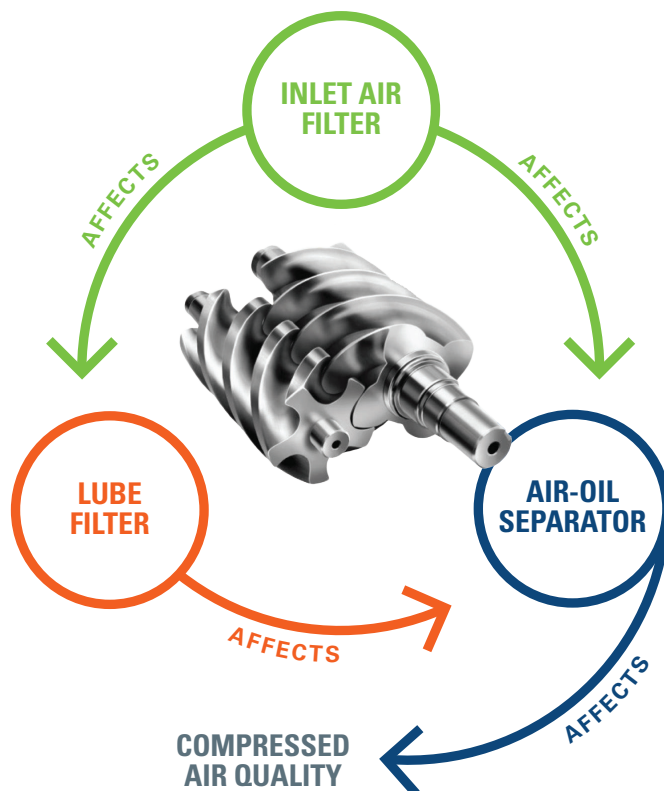

Engineered Protection for Reliable Compressor Performance

Donaldson provides original equipment manufacturers, distributors, and maintenance professionals with an extensive line of filtration solutions for all major brands of stationary and portable air compressors.

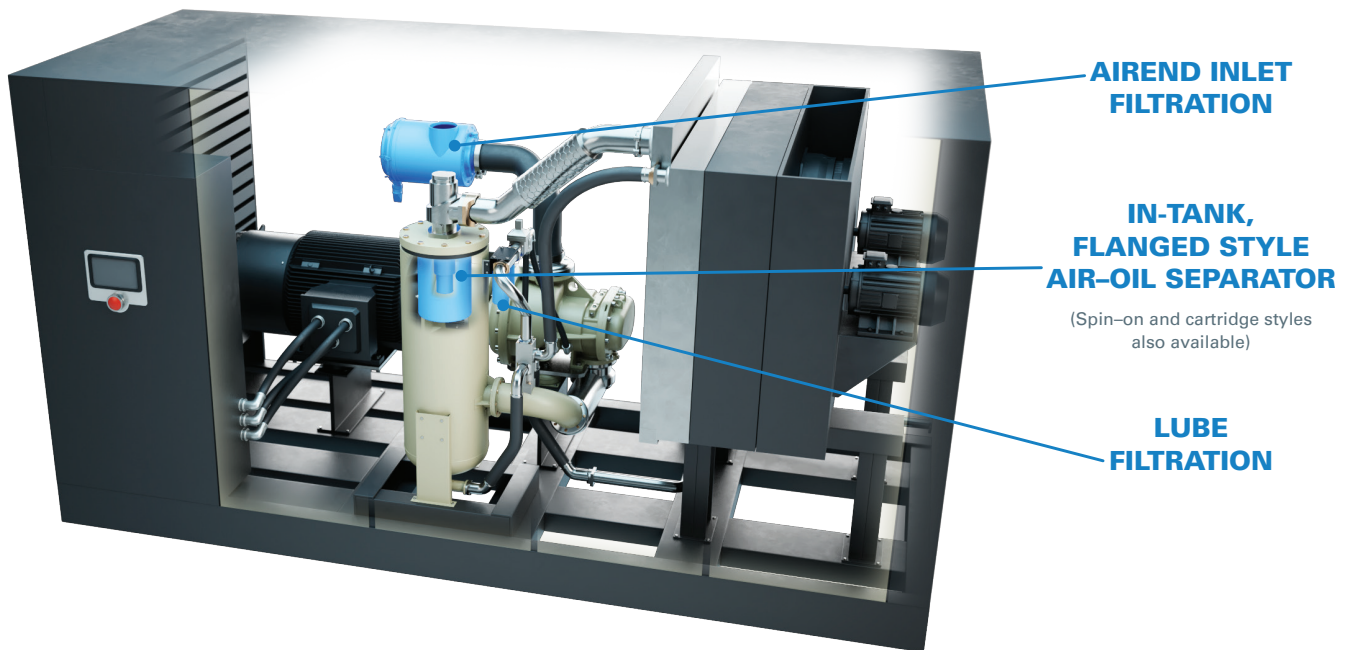

- + **Industry-Leading Engineering** – Filter media and housing deliver high-efficiency filtration.
- + **OEM-Grade Solutions** – First-fit choice of multiple compressor manufacturers around the world.
- + **Broad Application Coverage** – Portfolio includes air-oil separators, air inlet, lube, fuel, and exhaust filters.
- + **Customer Service** – Support teams work with you to find what you need for your system.
- + **Consistent Product Availability** – The filters you need, when you need them.
- + **Distribution that Makes a Difference** – Support from partners who know air compressors.
- + **Warranty** – Industry-leading coverage to help you extend the life of your equipment.

With Donaldson protection for your compressor, you can extend the time between filter replacements increasing uptime and reducing the total cost of ownership.

COMPLETE COVERAGE FOR YOUR COMPRESSOR

Comprehensive range of filtration solutions engineered to help drive performance in stationary and portable rotary screw compressors.

Air-Oil Separators

Compressor air-oil separators are tailored to match your system specifications. Whether you want to minimize separator pressure drop to increase energy efficiency or limit oil carryover to help reduce maintenance costs, Donaldson can manufacture what you need.

Inlet Air Filters

More than 100 years ago, Donaldson invented the world's first air cleaner for a tractor engine. Since then, we have been leading the way in filtration technology. Our teams are continually working on more efficient and effective designs. When it comes to the compressor market, we've engineered solutions to handle every flow range, service cycle, and environmental challenge.

Lubrication Filters

With more than 35 types of filtration media available, lube filter designs can be tailored to fit your exact compressor application. These can be custom-built to filter specific contaminants and meet selected element-life requirements. Donaldson lube filters provide high efficiency and capacity for long service life.

Fuel Filters

Produced with performance in mind, Donaldson manufactures a complete line of primary and secondary fuel filters for portable air compressors. Durable construction and easy changeouts make these filters ideal for challenging in-the-field applications.

PREMIUM MEDIA. PROVEN PERFORMANCE.

Filtration media is the most critical component in any filter. Donaldson offers variations of its unique Synteq™ XP media exclusively for use in premium air-oil separators. Its innovative coalescing design provides outstanding performance and long filter life.

- + **Proprietary bi-component fibers for a strong bond**
- + **Resin-free media for low air restriction**
- + **Exceptionally low oil carryover**
- + **Superior draining**
- + **Long filter life**

Dependable Filtration. Lasting Protection.

Donaldson offers a wide selection of air-oil separators, inlet air filters, and lube filters – engineered to fit and integrate seamlessly into many compressor models. Each component is designed to deliver consistent, dependable filtration.

Count on Donaldson for filtration solutions that support the performance and longevity of your assets.
